Specialty Consultants for **YOUR** industry

... delivering INFORMATION  
... delivering SOLUTIONS  
to YOUR specific problems

All of which enables you to  
concentrate on  
- *your business*  
- *your customers*  
- *your bottom line*

From custom-built enterprise-wide  
intranets to wireless web projects,  
or from fiber-sensing technologies  
to new pipeline monitoring systems ...

Whether connecting employees through  
custom-built intranets or linking field  
people to critical data through PDAs ...

When your customers  
or your employees  
*count on you* ...

*"We'll find a way  
to do that for you."*

***Delivering is our business and our specialty.***

**With over 20 years experience, nobody knows your industry like we do and with the commitment, skills and talent of a young management and development team, nobody delivers like IPEG.**

**The relationship we develop with a client is reflected in the quality of the product we deliver. It's not *just* about technology, it's about a *personal* relationship.**

## ***Business Divisions***

### **eBusiness**

custom-built enterprise-wide intranets, wireless web, web-based customer support, advanced website development & management.

### **Technology Assessment & Development**

analysis of emerging technologies, pipeline integrity, remote monitoring, fiber sensing & interferometry, wireless integration, mapping, GPS, PDA, field testing.

### **Market Research**

new product initiatives, product specification, return-on-investment analysis, competitive analysis, distribution channels, global compliance issues.

---

Our specialty is delivering practical solutions to operational problems that enable our clients and their customers to safely and cost-effectively manage their networks and facilities, to focus R&D expenditure where it counts most and to market their products and services with optimum effectiveness.

We possess and offer a rare blend of technical knowledge and practical commercial experience.

Based on our extensive experience, we specialize in the Test and Measurement Sector. Our clients and customers range from equipment manufacturers to utility and communications companies.

We combine technical expertise and field experience with an enthusiastic commitment to deliver on-time and maintain close strategic relationships with several prominent pipeline, telecommunication companies and equipment manufacturers.

Our experience in these industries enables us to bring rapid focus, a variety of skill sets and concise practical solutions to a wide range of industry problems.

We know your business  
because we ARE your business.
